David Schulze
KES Science & Technology, Inc.

Dear Dave,

Thanks for calling yesterday to follow up on the *AiroCide PPT* system we have here at Pittsburgh Cut Flower Co. As I said on the phone we are very happy with the results.

For over a century, Pittsburgh Cut Flower Co. has been a leader in the distribution of flowers and floral products to retail florists in our region. We're committed to providing our customers the highest quality products and outstanding service. When I noticed a group of flowers exhibiting symptoms caused by mold in one of my coolers I immediately looked for a solution.

The *AiroCide PPT* system that was installed in January has made a tremendous improvement in the quality of my flowers. I no longer have mold issues and am confident that my customers are getting flowers that will stay fresher, longer.

Thank you for introducing me to this technology. I recommend any floral professional looking for new ways to ensure top-quality products try the *AiroCide PPT*.

Sincerely,

Dave Euston
